Malt

50g

Malt paste is a solution to remove and prevent hairballs in cats.

- High palatability
- Contains vitamin E and fatty acids
- Contains Taurine and ARBOCEL

INDICATIONS

Malt paste contains substances that soften the stools, emulsify the hair, and facilitate the hairballs elimination.

COMPOSITION

Malt (extract), Vegetable oil and fat (Soybean oil, Sunflower oil), Mono di and tri glycerides of fatty acids.

Vitamin E 3a700	25.000 UI
Taurine 3a370	62,600 mg
Microcrystalline Cellulose E460 (ARBOCEL)	40,000 mg

PRESENTATION

Tube with 50 gr.

POSODOGY

Administer 2-5 cm of paste, according to the size of the animal

KEY ASPECTS

- It is not only a malt extract, it also contains Taurine, fatty acids and Vitamin E.
- Another fundamental aspect is the presence in its composition of **ARBOCEL** (registered cellulose powder).
- **ARBOCEL** is a source of insoluble fiber that reinforces the dragging action. The anti-hairball capacity shown by Arbolcel is much higher when compared to other soluble and insoluble fibers.

Two actions:

- 1) Arbolcel forms a network of insoluble fiber that prevents binding of the hair fibers in the stomach favoring the passage to duodenum and its elimination in the feces.
- 2) Arbolcel speeds up the gastrointestinal transit favoring the transit of the hair and its elimination in the feces.

ANALYTICAL CONSTITUENTS

Crude protein	3,0%
Crude fiber	4,0%
Crude fat	48,0%
Crude ash	3,0%
Moisture	2,5%

INSTRUCTIONS FOR PROPER USE

For adult cats

Administer directly into the mouth or mixed with moist feed. It could be administered orally by depositing the recommended dose on either of the front paws or on the muzzle. Water should be available at all times.
